

# **User Manual**

# **Edition Notes**

The Ovation E-930VW User Manual includes a description, safety precautions, installation, programming, operation and maintenance instructions for the Ovation E-930VW.

#### **Trademarks**

CHAUVET, the Chauvet logo and Ovation E-930VW are registered trademarks or trademarks of Chauvet & Sons, LLC (d/b/a Chauvet and Chauvet Lighting) in the United States and other countries. Other company and product names and logos referred to herein may be trademarks of their respective companies.

# **Copyright Notice**

The works of authorship contained in this manual, including, but not limited to, all design, text and images are owned by Chauvet.

#### © Copyright 2020 Chauvet & Sons, LLC. All rights reserved.

Electronically published by Chauvet in the United States of America.

#### Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

## **Document Printing**

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

#### **Intended Audience**

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

#### **Disclaimer**

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Download the latest version from <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a>.

#### **Document Revision**

This Ovation E-930VW User Manual is the 5<sup>th</sup> edition of this document. Go to <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a> for the latest version.

# 1. Before You Begin

## What Is Included

- Ovation E-930VW
- Neutrik® powerCON® power cord

#### · Quick Reference Guide

### **Claims**

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate customer's claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

#### **Manual Conventions**

| Convention              | Meaning   |  |
|-------------------------|---|--|
| 1–512 A range of values |   |  |
| 50/60                   | 50/60 A set of values of which only one can be chosen |  |
| <set></set>             | A button on the product's control panel               |  |
| Settings                | A product function or a menu option                   |  |

# **Symbols**

| Symbol     | Meaning   |  |  |  |
|------------|---|--|--|--|
| A          | Electrical warning. Not following these instructions may cause electrical damage to the product, accessories, or the user.  |  |  |  |
|            | Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator. |  |  |  |
| <b>(i)</b> | Important installation or configuration information. The product may not function correctly if this information is not used.  |  |  |  |
|            | Useful information.   |  |  |  |

The term "DMX" used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

# **FCC Compliance**

This device complies with Part 15 Part B of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## **Safety Notes**

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

### **Personal Safety**

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

### **Mounting and Rigging**

- Do not operate this product outdoors or in any location where dust, excessive heat, water, or humidity may affect it (IP20).
- Do not leave any flammable material within 50 cm of this product while operating or connected to power.
- CAUTION: When transferring product from extreme temperature environments, (e.g., cold truck to warm, humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- When hanging this product, always secure to a fastening device using a safety cable.
- Use only the hanging/mounting bracket to carry this product.

### **Power and Wiring**

- Always ensure that the product is connected to proper voltage in accordance with the specifications in this manual or on the product's specification label.
- Never connect the product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.

# Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate the product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- In the event of a serious operation problem, stop using this product immediately!

If your Chauvet product requires service, contact Chauvet Technical Support.

# **Expected LED Lifespan**

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

# 2. Introduction

# **Description**

The Ovation E-930VW is a high-performance, variable white ellipsoidal-style fixture that uses Chauvet's unique six-color LED system. The fixture projects a bright and beautifully flat field of light in nearly any temperature of white with high CRI and CQS. Each color temperature can be further adjusted for +/- green to perfect the field of light. Full control of each color is available for times when a splash of color is needed.

### **Features**

- · Operating modes:
  - 3-channel: dimmer, color temperature, hue
  - 5-channel: dimmer, 16-bit dimmer, color temperature, hue, strobe
  - · 6-channel: red, orange, green, royal blue, blue, lime
  - 8-channel: dimmer, red, orange, green, royal blue, blue, lime, strobe
  - 11-channel: dimmer, red, orange, green, royal blue, blue, lime, strobe, color temperature, hue, dimmer speed
  - 15-channel: dimmer, 16-bit dimmer, red, fine red, orange, fine orange, green, fine green, royal blue, fine royal blue, blue, fine blue, lime, fine lime, strobe
  - 18-channel: dimmer, 16-bit dimmer, red, fine red, orange, fine orange, green, fine green, royal blue, fine royal blue, blue, fine blue, lime, fine lime, strobe, color temperature, hue
- · Variable white ERS-style lighting fixture for theatre, film, and production
- Color temperature presets from 2800 K to 8000 K with high CRI and CQS
- · Beautiful 16-bit dimming
- · Proprietary LED engine delivers tremendous equal output at all color temperatures
- +/- green adjustment via DMX or on-board control
- · Independent color control over the six-color engine when a splash of color is needed
- · RDM (Remote Device Management) for added flexibility
- · Adjustable PWM (Pulse Width Modulation) to avoid flickering on camera
- Virtually silent operation for use in studio and theater applications
- Works perfectly with industry-standard lens tubes and accessories

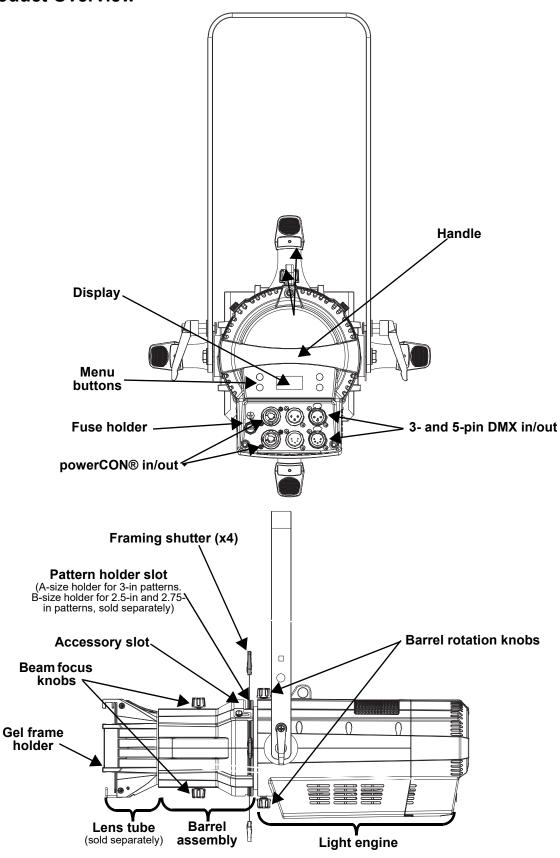

#### Lens Tube

The following lens tubes are available for purchase:

- 14° w/ gel frame (7.5 in/191 mm accessories)
- 19° w/ gel frame (6.25 in/159 mm accessories)
- 26° w/ gel frame (6.25 in/159 mm accessories)
- 36° w/ gel frame (6.25 in/159 mm accessories)
- 50° w/ gel frame (6.25 in/159 mm accessories)
- 15°-30° w/ gel frame (7.5 in/191 mm accessories)
- 25°-50° w/ gel frame (7.5 in/191 mm accessories)

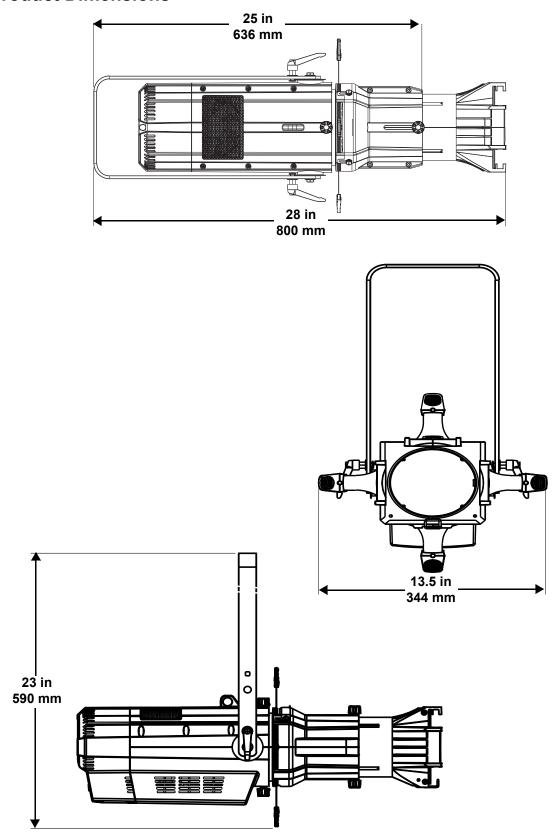

# **Product Overview**

# **Product Dimensions**

# 3. Setup

#### **AC Power**

Each Ovation E-930VW has an auto-ranging power supply that works with an input voltage range of 100 to 240 VAC, 50/60 Hz. To determine the power requirements for each Ovation E-930VW, refer to the label affixed to the product or to the <u>Technical Specifications</u> chart in this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, download Sizing Circuit Breakers from the Chauvet website: <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a>.

- Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

### AC Plug

The Ovation E-930VW comes with a power input cord terminated with a Neutrik® powerCON® connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with the product has no plug, or if the plug needs to be changed, use the table below to wire the new plug.

| Connection    | Connection Wire (U.S.) |              | Screw Color     |  |
|---------------|------------------------|--------------|-----------------|--|
| AC Live Black |                        | Brown        | Yellow or Brass |  |
| AC Neutral    | White                  | Blue         | Silver          |  |
| AC Ground     | Green/Yellow           | Green/Yellow | Green           |  |

### **Power Linking**

The product supports power linking. It is possible to power link up to 5 products at 120 V, up to 9 products at 208 V, or up to 10 products at 230 V. This product comes with a power input cord. Power-linking cables are available for purchase from Chauvet.

### **Fuse Replacement**

- 1. Disconnect this product from the power outlet.
- 2. Using a Phillips-head screwdriver, unscrew the fuse holder cap from the housing.
- 3. Remove the blown fuse and replace with another fuse of the same type and rating (T 3.15 A, 250 V).
- 4. Screw the fuse holder cap back in place and reconnect power.

Make sure to disconnect the product's power cord before replacing a blown fuse. Always replace the blown fuse with another of the same type and rating.

# **DMX Linking**

The Ovation E-930VW can be linked to a DMX controller using a 3- and 5-pin DMX connection. If using other DMX-compatible products with this product, it is possible to control each individually with a single DMX controller.

#### **DMX Personalities**

The Ovation E-930VW uses a 3- and 5-pin DMX data connection for the **3Ch**, **5Ch**, **6Ch**, **8Ch**, **11Ch**, **15Ch**, and **18Ch** DMX personalities.

- Refer to the <u>Introduction</u> for a brief description of each DMX personality.
- Refer to the <u>Operation</u> chapter to learn how to configure the Ovation E-930VW to work in these personalities.
- The <u>Configuration (Standalone)</u> section provides detailed information regarding the DMX personalities.

For information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: <a href="https://www.chauvetprofessional.com">www.chauvetprofessional.com</a>.

#### Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Ovation E-930VW supports RDM protocol that allows feedback to make changes to menu map options.

## **Master/Slave Connectivity**

The Master/Slave mode allows an Ovation E-930VW (the master) to control one or more Ovation E-930VW products (the slaves) without a DMX controller. One Ovation E-930VW becomes the master when running an auto or custom program, or by being in a Static mode.

Each slave's control panel must be configured to operate in Slave mode. During Master/Slave operation, the slaves will operate in unison with the master.

DO NOT connect a DMX controller to products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master.

- The <u>Operation</u> section of this manual provides detailed instructions on how to configure the master and slaves.
- For more information about DMX standards or the DMX cables needed to link this
  product to a DMX controller, download the DMX primer from the Chauvet website:
   <u>www.chauvetprofessional.com</u>.

## Mounting

Before mounting the product, read and follow the safety recommendations indicated in the <u>Safety Notes</u>. For CHAUVET Professional line of mounting clamps, go to: <a href="http://trusst.com/products/">http://trusst.com/products/</a>.

#### Orientation

Always mount this product in a safe position, ensuring that there is adequate room for ventilation, configuration, and maintenance.

#### Rigging

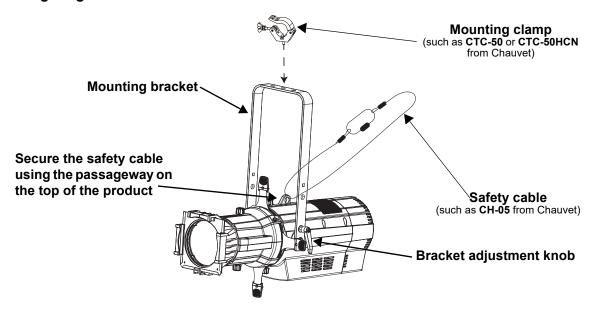

Chauvet recommends using the following general guidelines when mounting this product:

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which the product will be mounted can support the product's weight. See the <u>Technical Specifications</u> for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

#### Procedure

The Ovation E-930VW comes with a double-bracketed yoke that can be used as a floor stand or to which mounting clamps can be attached for hanging. Mounting clamps must be purchased separately. Ensure that the clamps can support the weight of this product. Use at least one mounting point per product where necessary.

#### **Mounting Diagram**

#### **Manual Beam Focus Control**

The Ovation E-930VW has a manual focus, which is adjusted as follows:

- Locate the beam focus knobs at the top and bottom of the barrel assembly.
- Loosen the knobs by turning them counter-clockwise.
- 3. Slide the lens tube forward or backward until the desired focus or beam edge is achieved.
- 4. Tighten the knobs by turning them clockwise, which lock the lens tube's position.

To avoid changing menu settings while focusing the Ovation E-930VW, press and hold the <ENTER> button for 3 seconds. This will put the product in Focus Mode, by increasing the intensity to 100%. To exit out of focus mode, press <MENU>.

### **Rotating the Barrel Assembly**

The Ovation E-930VW allows manual rotation of the barrel assembly, as follows:

- 1. Locate the barrel rotation knobs at the top and bottom of the light engine.
- 2. Loosen the knobs by turning them counterclockwise. (**Note**: Do not remove the knobs.)
- 3. Rotate the barrel to the desired position, up to 25° in either direction from the centered position.
- 4. Tighten the knobs by turning them clockwise, which locks the barrel's position.

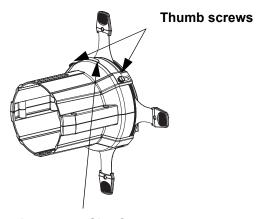

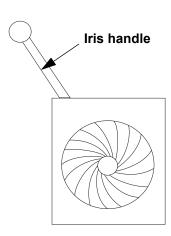

Ensure that the barrel assembly is oriented with the pattern holder and accessory slots at the top of the product.

### **Accessory Slot**

The Ovation E-930VW has an accessory slot, which holds a drop-in iris, a motorized pattern device, or various other optional accessories (sold separately).

- 1. Loosen the thumbscrews on the slot cover. (Note: Do not remove the thumbscrews).
- 2. Slide to cover forward.
- Insert an accessory. (Note: Make sure to insert the accessory correctly, i.e., the iris handle extends upward from the slot.)
- 4. Slide the cover back. Make sure any handles or adjustment tools that stick out the top are able to function correctly.
- 5. Tighten the thumbscrews to secure the cover.

**Accessory Slot Cover** 

Sample Drop-in Iris

- When not using the accessory slot, replace and secure the slot cover to prevent light leakage during operation.
- When obtaining any optional accessories, ensure that the items are compatible with the Ovation E-930VW.

# 4. Operation

# **Control Panel Operation**

| <menu> Exits from the current menu or function</menu> |  |  |
| <enter></enter>                                       | Enables the currently displayed menu or sets the currently selected value in to the current function |  |
| <up></up>   | Navigates upward through the menu list or increases the numeric value when in a function             |  |
| <down></down>   | Navigates downward through the menu list or decreases the numeric value when in a function           |  |

## **Control Options**

Set the Ovation E-930VW starting address in the 001-512 DMX range. This enables control of up to 10 products in the 18-channel personality.

# **Programming**

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press **<MENU>** repeatedly until the option shows on the display. Press **<ENTER>** to select. This will show the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until
  the option shows on the display. Press <ENTER> to select. This will show either the first option if
  there is another programming level, or the selected value.
- Press <MENU> repeatedly to exit to the previous main level.

# Configuration (DMX)

Use DMX configurations to operate the product with a DMX controller.

#### **DMX Personalities**

This setting allows the user to choose a particular DMX personality.

- 1. Go to the **DMX Channel** main level.
  - Select the desired personality (3Ch, 5Ch, 6Ch, 8Ch, 11Ch, 15Ch, and 18Ch).

- See the <u>Starting Address</u> section for the highest starting address suggested for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

### **Starting Address**

In this mode, each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison.

- 1. Go to the **DMX Address** main level.
- 2. Set the starting address (001–512).

The highest recommended starting address for each DMX mode is as follows:

| DMX Personality | DMX Address | DMX Personality | DMX Address |
|-----------------|-------------|-----------------|-------------|
| 3Ch             | 510         | 11Ch            | 502         |
| 5Ch             | 508         | 16Ch            | 497         |
| 6Ch             | 507         | 18Ch            | 495         |
| 8Ch             | 505         |                 |             |

| Reset<br>Factory |                            |                        |  | Resets the product to factory default settings             |   |

# **Configuration (Standalone)**

Use standalone configuration to operate the product without a DMX controller.

#### **Static Mode**

The Static mode allows for an unchanging color without a DMX controller.

#### **Color Temperature**

To select a color temperature, do the following:

- 1. Go to the **Static** main level.
- 2. Select Color Temperature.
- 3. Select the desired color temperature (see Configuration (Standalone)).
- 4. Select the desired output level (0–255).

#### **Manual Color Mixer**

To do color mixing without a DMX controller, follow the instructions below:

- 1. Go to the **Static** main level.
- 2. Select Manual Color Mixer.
- 3. Select the color to edit (Red, Orange, Green, Royal Blue, Blue, or Lime Green).
- 4. Select the desired output level for that color (0-255).
- 5. Repeat steps 3 and 4 until product outputs as desired.

#### Red Shift

The Red Shift function causes the amber LEDs to imitate the appearance of a halogen lamp when dimming. To adjust the Red Shift function, do the following:

- 1. Go to the **Red Shift** main level.
- 2. Select On or Off.

#### Master/Slave

The Master/Slave mode allows a group of Ovation E-930VW products (the slaves) to simultaneously duplicate the output of another Ovation E-930VW (the master) without a DMX controller. To set each of the slaves:

- 1. Go to the Master/Slave main level
- Select Slave.

To set the master:

- 1. Go to the Master/Slave main level
- Select Master.
- Select a static setting.

- The master is the one that runs a program whether in Auto or Static mode.
- Do not connect a DMX controller to the products configured for Master/Slave operation. The DMX controller may interfere with signals from the master.
  - The master should be the first product in the daisy chain.

#### **Dimmer Curve**

To set the dimmer curve, follow the instructions below:

- 1. Go to the Dimmer Curve main level.
- 2. Select the desired option (Linear, Square, I Squa, or SCurve).

#### **Dimmer Profiles**

This setting determines how fast the output of the Ovation E-930VW changes when the output value is modified. It provides four different options to simulate the dimming curve of an incandescent lighting product. To select a specific dimmer profile, do the following:

- 1. Go to the **Dimmer Mode** main level.
- Select a dimmer curve (Off, Dimmer 1, Dimmer 2, or Dimmer 3).

Off: The output is proportional (linear) to the dimmer channel value.

Dimmer 1-3: The output follows the dimmer value based on the corresponding dimmer curve, Dimmer 1 being the fastest.

#### White Balance

This setting determines the maximum output values for each color, which affects the appearance of a full output white.

- 1. Go to the White Balance main level.
- 2. Select **Off** (the product will use a default setting) or **Manual**.
- For Manual mode, select the color value to edit (Red, Orange, Green, Royal Blue, Blue, or Lime Green).
- Set the maximum value for the selected color (125–255).
- 5. Repeat steps 3 and 4 until the product outputs as desired.

#### LED Frequency

This option changes the Pulse Width Modulation (PWM) frequency of the LEDs on the Ovation E-930VW. To do so, follow the instructions below:

- 1. Go to the **LED Frequency** main level.
- 2. Select PWM Frequency (600Hz, 1200Hz, 2000Hz, 4000Hz, 6000Hz, or 25Khz).

#### **Fan Mode**

This setting determines how the fan speed on the Ovation E-930VW is set.

- 1. Go to the **Fan Mode** main level
- 2. Select **Auto** (fan speed will increase or decrease based on product temperature), **Off** (fan will stay off. Product output will decrease based on product temperature), **Silent** (fan will maintain a constant silent speed), or **On** (fan speed will always be at maximum).

NOTICE: When operating in Fan Mode: Off, the output of the fixture will be reduced and will not reach the same levels as when using other fan modes.

WARNING: When operating in Fan Mode: Off, the fixture will become hotter to the touch than when using other fan modes. Use proper protective equipment to prevent burns. Keep a safe distance from flammable objects.

### **Back Light**

This setting allows for selection of the amount of time the backlight on the Ovation E-930VW's display stays on after the last button is pressed on the control panel.

- 1. Go to the **Back Light** main level.
- 2. Select 10S (10 seconds), 30S (30 seconds), 2Min (2 minutes), or Always On (remains on).

#### **System Information**

This option displays the total number of hours the product has run, the installed software version, and the product's UID.

- Go to the **Information** main level.
- 2. Select Fixture Hours, LED Hours, Version, or UID.

#### **Factory Reset**

This option restores the Ovation E-930VW to factory default settings.

- 1. Go to the **Reset Factory** main level.
- 2. Select No or Yes.

# **Preset Color Temperature Chart**

| DMX Channel Value                 | Color Temperature | DMX Channel Value                 | Color Temperature |

# 5. Technical Information

### **Product Maintenance**

To maintain optimum performance and minimize wear, clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

Clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean the product:

- 1. Unplug the product from power.
- 2. Wait until the product is at room temperature.
- Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
- Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
- 5. Apply the solution directly to a soft, lint-free cotton cloth or a lens-cleaning tissue.
- 6. Softly drag any dirt or grime to the outside of the transparent surface.
- 7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

| Ovation E-930VW | 03121411  | 781462217594 |

# Returns

Send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.

Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.

To submit a service request online, go to <a href="https://www.chauvetprofessional.com/service-request">www.chauvetprofessional.com/service-request</a>.

Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Once you have the RMA number, provide the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
