

# **Strand** CODA LED CYC

# INTRODUCTION

## OUR GOAL

We are committed to providing you the highest quality in customer service. Our comprehensive resources are available to help your business succeed and ensure you get the full benefit of being a customer.

## **TECHNICAL SUPPORT**

Our Service and Support team is tasked with online and field support, repair, demo, commissioning, maintenance contracts, and technical training for fixtures and systems. In addition, this team plays a large role in a Systems sales, responsible for administering final commissioning, record-keeping, and organizing services. Refer to the back cover of this User Manual for contacts in your region or visit www.vari-lite.com/support

## CUSTOMER SERVICE

Customer Service is responsible for boxed goods and spare parts quotations, order entry and fulfilment, project delivery, lead times, and general account management. They also manage all after sales warranty fulfilment, RGA, and repairs invoicing in tandem with our After Sales Service & Support team. Visit our website to find a customer service agent in your region.

## ADDITIONAL DOCUMENTATION

Additional product documentation, including DMX maps, software, and photometric reports, are available for download on our website.

For more information on installing DMX512 control systems, the following publication is available for purchase from the United States Institute for Theatre Technology (USITT), "Recommended Practice for DMX512: A Guide for Users and Installers, 2nd edition" (ISBN: 9780955703522).

**USITT Contact Information:**

## ABOUT THIS DOCUMENT

Read all instructions before installing or using this product. Retain this User Manual for future reference. Additional product information and descriptions may be found on the product data sheet(s) which can be downloaded from the website at **www.vari-lite.com**.

This User Manual provides necessary information regarding safety, installation, operation and routine maintenance for CODA LED CYC. Familiarizing yourself with this information will help you to get the most out of your product.

**WARNING:** It is important to read ALL accompanying safety and installation instructions to avoid damage to the product and potential injury to yourself or others.

## SAFETY WARNINGS AND NOTICES

Read this user manual in full before attempting to install, operate or maintain the fixture to which it relates. This user manual is intended to provide general guidance to such suitably qualified personnel. Installation and operation of the fixture are to be performed by qualified personnel only.

When using electrical equipment, basic safety precautions should always be followed including the following:

#### READ AND FOLLOW ALL SAFETY INSTRUCTIONS.

- For indoor, dry location use only. Do not use outdoors unless fixture is suitably IP rated.
- Use safety tether when mounting.
- Equipment should be mounted in locations and at heights where it will not be readily subjected to tampering by unauthorized personnel.
- Not for residential use. Do not use this equipment for other than intended use.
- Note distance requirement(s) from combustible materials or illuminated objects. Do not mount near gas or electric heaters.
- Install only in locations with adequate ventilation. Ensure sure that ventilation slots are not blocked.
- Ensure that the voltage and frequency of the power supply match the power requirements of the fixture.
- The fixture must be earthed/grounded to the appropriate conductor.
- Do not operate fixture outside the specified ambient temperature range.
- Do not connect the fixture to any dimmer pack.
- The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition and void warranty.
- Refer service to qualified personnel. This fixture contains no user serviceable parts.
- Prior to first use, carefully inspect fixture to ensure no damage has occurred during shipping.
- Materials used in the manufacturing process can cause strong odors when the product is new. These odors dissipate over time.
- Prior to each use, carefully inspect power cables and replace any damaged cables.
- Exterior surfaces of the luminaire will be hot during operation. Take appropriate precautions.
- Continuous use of the fixture may shorten the lifespan. Power down the fixture when not in use.
- Do not cycle power on and off repeatedly. Disconnect mains power if the fixture is not used for an extended period.
- Clean fixtures regularly, particularly when working in a dusty environment.
- Never touch power cables or wires while the fixture is powered on.
- Avoid entangling power wires with other cables.
- In the event of a serious operating problem, immediately discontinue using the fixture.
- It is hazardous to operate luminaires without lens or shield. Shields, lenses, or ultraviolet screens shall be changed if they have become visibly damaged to such an extent that their effectiveness is impaired, for example, by cracks or deep scratches.
- Original packing materials can be reused for transporting the fixture.
- Do not look directly at the LED light beam while the fixture is on.
- This is a Class A product. In a domestic environment this product may cause radio interference, in which case, the user may be required to take adequate measures.
- The light source contained in this luminaire shall only be replaced by the manufacturer or service agent or similarly qualified person.

#### SAVE THESE INSTRUCTIONS.

WARNING: Refer to National Electrical Code<sup>®</sup> and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel. Caution Against Direct Sunlight Through Front Lens Assembly

## CAUTION AGAINST DIRECT SUNLIGHT THROUGH FRONT LENS ASSEMBLY

The design and nature of the front lens assembly in Vari-Lite LLC luminaires is to efficiently focus the light energy from the luminaire's lamp for maximum light output.

- When the front lens assembly is exposed to direct sunlight or intense light from neighboring fixtures, the lens will collect and intensify this light and focus it back into the fixture. Intense sunlight or beams from other fixtures can cause damage to internal assemblies contained within the fixture.
- When fixture is not in use and direct sunlight or other intense light is present, position luminaires so their front lens assembly it not directly exposed to the light source.

### CAUTION AGAINST POWERING LUMINAIRES FROM DIMMER CIRCUITS

It is not recommended to power any Vari-Lite LLC luminaire from a dimmer - even in 'NONDIM' mode. Dimmer and non-dim modules are not suitable sources of power because their output modifies the AC wave form. This may work for a short time, but eventually results in power problems, luminaire mis-operation and/or failure.

- When using a power distribution rack, do not use dimmer or non-dim modules to power any Vari-Lite LLC luminaire. Damage to the luminaire can occur.
- Using a dimmer or non-dim module to power your Vari-Lite LLC luminaire will void your luminaire's warranty.

### CAUTION AGAINST THE USE OF THIRD PARTY PARTS OR ACCESSORIES

- Heat and heat distribution are important factors when operating Vari-Lite LLC luminaires. Vari-Lite LLC luminaires are designed to dissipate heat efficiently and safely. Any blockages or obstructions, such as aftermarket baffles, covers, enclosures, etc. can interrupt the luminaire's ability to dissipate heat properly and can damage the luminaire.
- Vari-Lite LLC cannot be responsible for issues arising from non-approved parts and accessories installed on or used with any Vari-Lite LLC product. Customers of such products should contact the manufacturer directly for assistance and support.

## TRANSPORTING LUMINAIRES

When shipping or transporting luminaires, Vari-Lite LLC recommends that the luminaire(s) be sufficiently protected against any (including, but not limited to) shock, vibration, drops, jarring, exposure to the environment, etc.

Failure to sufficiently protect any Vari-Lite LLC luminaire during shipping or transportation will result in damage and void the luminaire's warranty. Vari-Lite LLC will not be responsible for any shipping damage or breakage of any product under any circumstances. Vari-Lite LLC will not be responsible for any third party case manufacturer's cases.

**NOTE:** As with all automated luminaires, proper handling and suitable protective shipping cases should be used when transporting fixtures to reduce the risk of damage.

## TRANSPORTATION AND SHIPPING CASE REQUIREMENTS

Cases to transport Vari-Lite LLC luminaires should meet the following loading requirements:

- Luminaire head, yoke, and enclosure sub-assemblies shall be equally supported and constrained where no one sub-assembly (head, yoke, or enclosure) fully supports the entire mass of the luminaire.
- The interior of the case shall be of high quality and uniform density foam. The foam shall be of the same type and density throughout as to equally and uniformly support loading at every contact surface.
- The case shall, when laid on any of its six (6) surfaces, maintain the loading requirements outlined above.
- All cases not meeting the aforementioned loading requirements, with wheels, shall have markings on the exterior of the case that the unit is to be transported on it wheels only (e.g. "Case must be transported and remain [at all times] on its wheels").

## COMPLIANCE NOTICE

## FCC DECLARATION OF CONFORMITY

This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when this equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with Vari-Lite Strand system, service, and safety guidelines, may cause harmful interference to radio communications.

As tested under this standard:

### FCC 47CFR 15B clA\*CEI

Issued:2009/10/01 Title 47 CFR Part 15 Subpart B Unintentional Radiators Class A

Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his/her own expense.

**EU DECLARATION OF CONFORMITY** We, Vari-Lite LLC., 10911 Petal Street, Dallas, Texas 75238, declare under our responsibility for the products contained herein are in conformity with the essential requirements of the following European Directives and harmonized standards:

### Low Voltage Director (LVD), 2006/95/EC

EN 60589-2-17:1984+A1:1987+A2:1990 used in conjunction with 60598-1:2008/A11:2009

### Electromagnetic Compatibility Directive (EMC), 2004//108/EC

EN 55022:2010, EN55024:2010

## HOW TO OBTAIN WARRANTY SERVICE

A copy of the Limited Warranty card was included in the shipping package for this product.

To obtain warranty service, please contact customer service at 1-214-647-7880, or **entertainment.service signify.com** and request a Return Material Authorization (RMA) for warranty service. You will need to provide the model and serial number of the item being returned, a description of the problem or failure and the name of the registered user or organization. If available, you should have your sales invoice to establish the date of sale as the beginning of the warranty period. Once you obtain the RMA, pack the unit in a secure shipping container or in its original packing box. Be sure to clearly indicate the RMA number on all packing lists, correspondence, and shipping labels. If available, please include a copy of your invoice (as proof of purchase) in the shipping container.

With the RMA number written legibly on or near the shipping address label, return the unit, freight prepaid, to:

Vari-Lite LLC Attention: Warranty Service (RMA# \_\_\_\_\_) 10911 Petal Street Dallas, Texas 75238 USA

As stated in the warranty, it is required that the shipment be insured and FOB our service center.

**IMPORTANT!** When returning products to Vari-Lite for repairs (warranty or out-of-warranty) from a country other than the USA, "Vari-Lite LLC", must appear in the address block as the Importer of Record (IOR) on all shipping documentation, Commercial Invoices, etc. This must be done in order to clear customs in a timely manner and prevent returns.

# **1** DESCRIPTION

## FEATURES

- High output LED cyc
- High CRI RGBALC Color System with SmartColor Control
- Independent color mixing and temperature controls
- 2-zone color control
- Fanless design
- Adjustable frequency to exceed camera frame rates

Download the product datasheet from the website at www.vari-lite.com for the full technical specifications.

## COMPONENTS

The document provides installation and operation instructions for the following products:

Strand Coda LED Cyc

Read all instructions before installing or using this product. Retain this manual for future reference. Additional product information and descriptions may be found on the product specification sheet.

## INCLUDED ITEMS

Each Strand Coda LED Cyc luminaire includes the following items:

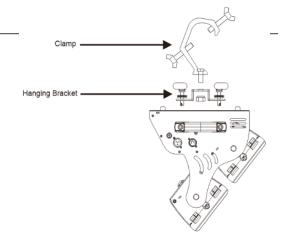

- Strand Coda LED Cyc
- Quick Start Guide

# 2 INSTALLATION

## MOUNTING

The unit should be mounted via its screw holes on the bracket. Always ensure that the unit is firmly fixed to avoid vibration and slipping while operating. Always ensure that the structure to which you are attaching the unit is secure and is able to support a weight of 10 times of the unit's weight. Always use a safety cable that can hold up to 12 times the weight of the unit when installing the fixture.

The luminaire must be mounted by professionals.

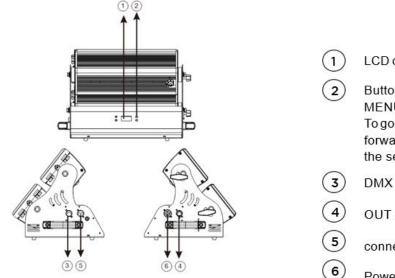

## MENU OPERATION 3

## SET UP

## CONTROL PANEL

## MAIN FUNCTIONS

To select any functions, press the MENU button until the required one is shown on the display. Select the function by the ENTER button and the display will blink. Use the DOWN and UP button to change the mode. Once the required mode has been selected, press the ENTER button to setup or it will automatically return to the main functions without any change after idling one minute. Back to the functions without any change press the MENU button. The main functions are shown in **TABLE 1**.

LCD display - shows the menu and selected functions

Buttons:

MENU - To select the programming functions DOWN -To go backward in the selected functions UP - To go forward in the selected functions ENTER - To confirm the selected functions

- DMX IN 5-pin XLR cable to link DMX console DMX
- OUT 5-pin XLR cable to link to the next unit DMX In -
- connects to power supply
- Power Out connects to next fixture

|               |                         | Clear All Presets                              | YES/NO       |  |         |         |

## **MENU SYSTEM**

## DISPLAY AND MENU SYSTEM OPERATION

The Display Menu system consists of several categories. Use the Menu Button to access the menu. Then use the Up/Down arrow to navigate. When you reach the desired item, touch the Enter Button. To go backwards, touch the Menu Button.

#### To navigate and access menu settings/selections:

- Step 1. Make sure unit is powered and turned on.
- Step 2. Touch [MENU] to access menu categories.
- Step 3. Use two Arrow ( $\blacktriangle \nabla$ ) buttons to navigate through the various options and settings.
- Step 4. Once menu item is reached, touch [ENTER] to access the menu item parameters.
- Step 5. Make changes to parameters as desired.
- Step 6. Press [ENTER] button to accept changes.

## ADDRESS

## ADDRESS

Sets the starting DMX address for the fixture. Can also be set via RDM.

## CONFIGURE

## LED

This menu allows for viewing the LED engine hours, setting the dimming curve, tungsten fade, dim snap, output mode, fan mode, LED frequency and white balance.

#### **LED Hours**

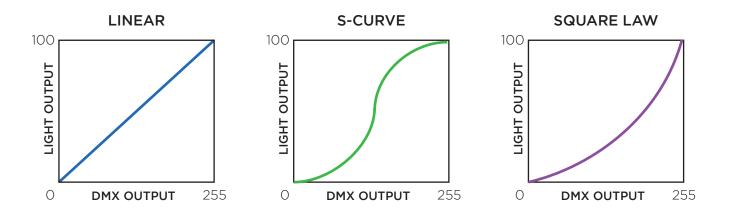

Displays the current LED engine hours.

#### **Reset LED Hours**

Allows the LED hours of the engine to be reset. Should only be done if the engine has been replaced

#### **Dimming Curve**

Select from Linear, S-Curve and Square Law. Can also be set via the control channel and RDM.

#### **Tungsten Fade**

Tungsten fade on will simiulate the red shift of a tungsten lamp while dimming. Will only function in SSCC mode with a CCT setting of 3200 °K.

#### Dim Snap

Dim Snap On allows for fastest output changes between levels but reduces smoothness dimming the LED engine. Dim Snap Off ensures all fades between output levels remains smooth and flicker free but limits fast, instant snaps between levels. Can also be set via the control channel and RDM.

#### **LED Frequency**

Choose the refresh rate of the LED engine (see Display Menu Tree for list).

#### White Balance

Allows for the fine tuning of the 'white' outut by adjusting the individual levels of Red, Green, Blue, Amber, Lime, and Cyan.

## COLOR CAL

Enabling color calibration allows greater consistency and useful ness of the 'white' output. Disabling allows for the greatest color control.

## DISPLAY TIMEOUT

Sets how long the display remains illuminated after the last button touch. Choose from 30 seconds, 5 minutes, 10 minutes, or always on.

## RESET

Resets all the factory defaults of the fixture. This includes setting the DMX Address to 001. Can also be done via RDM and via the control channel.

**NOTE:** Control channel will not change the current DMX address.

## DMX

## ADDRESS

Sets the starting DMX address of the fixture. Can also be set via RDM.

## DMX MODE

#### SSCC

Strand Smart Color Control - allows the luminaire to be used as a traditional subtractive color mixing (CMY) fixture. The base white color temperature can be adjusted using the CCT channel.

#### SQCC

Strand Quick Color Control - allows for simple access of colors via the preset color channel only.

#### SOCC

Strand Opensource Color Control - allows full access of the Red, Green, Blue, Amber, Lime, and Cyan LEDs for complete control over the color mix.

## DMX FAIL

### DMX Hold

If DMX is lost, fixture will maintain its present state until DMX is restored.

### Blackout

If DMX is lost, fixture will go to blackout until DMX is restored.

### **Goto Preset**

If DMX is lost, fixture will go to the preset (1 through 20).

## DATA

Allows the current DMX value present on each of the luminaire's DMX channels to be viewed.

## FIXTURE

## UID

Displays the UID as set in the luminaire.

## STATUS

Shows list of error message from previous calibration. If none, it will say No Errors.

## **REBOOT FIXTURE**

Restarts the entire operating system of the fixture. Can be performed via the control channel or RDM.

## VERSION

Shows the current software version of the fixture. Version is listed in MM/DD/YY format. Can be viewed via RDM.

## **FIXTURE HOURS**

Shows the accumulated hours the fixture has been powered on. Can be viewed via RDM.

## CROSSLOAD (SOFTWARE)

Allows the current version of software installed in the fixture to be sent to other units via an attached DMX cable.

## SERVICE - DIAGNOSTICS

### **Board Check**

Shows the current status of the control board.

### **Sensor Check**

Shows the current temp at the LED in °C.

## MANUAL PRESET

## PLAYBACK

#### **Power Up Preset**

Selects the preset (1 to 20) that will be played back after power up if enabled.

#### Intensity

Selects the master intensity of a preset being played back (0 to 255).

#### Priority

Choose Preset if you always want a preset to playback. Choose DMX if you only want a preset to playback if there is no DMX present.

#### Power Up?

Choose Preset On if you want the fixture to playback the preset at power up. Choose Preset Off if you do not want a preset to play.

## EDIT PROGRAMS

#### Load Preset

Select from preset 1 to 20 and touch [ENTER]. That preset will be played back.

#### **Edit Settings**

Choose the function from the list you wish to edit and touch [ENTER]. Use the [UP]/[DOWN] buttons to set desired value. Touch [ENTER] to store. Then continue to adjust all function desired.

#### Store

After setting all your functions, select which preset number you wish to store (1 to 20) and touch [ENTER]. Touch [ENTER] again to confirm when prompted.

#### Clear

Select the preset (1 to 20) you wish to clear and touch [ENTER]. Touch [ENTER] again to confirm when prompted.

#### **Clear All Presets**

When prompted, touch [ENTER] to confirm and all presets (1 to 20) will be erased.

#### WARNING: Clearing the presets CANNOT be undone!

Presets can also be stored via a DMX controller using the control channel.

## 4 DMX MAPPING

The fixture can be operated by DMX controller. The following tables assumes a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

| DMX<br>CHANNEL | PARAMETER        | DEFAULTS | RANGE<br>DMX | DESCRIPTION   |  |  |
|----------------|------------------|----------|--------------|---|--|--|
| 1              | Intensity (High) |          | 0 05575      | 16-bit Intensity (Dimmer) Control   |  |  |
| 2              | Intensity (Low)  | 0        | 0 - 65535    | 0 - 100% Output<br>Main or Cell 1 depending on group selection            |  |  |

| RANGE<br>DMX | ITEMS  | DESCRIPTION  | POWER CYCLE<br>RULES  | FUNCTION<br>SELECTION VIA U              |
|--------------|--|--|---|--|
| 0 - 255      | Control Channel  | Control Channel used for full fixture settings,<br>lamp controls, and miscellaneous modes. Set<br>discrete value of desired effect, wait >3 seconds,<br>then set value to 0 (Idle). **Function does not<br>require 3 Second rule to active, setting output | N/A   | N/A                                      |
| 0 - 5        | Idle (Default)   | Default value used as return point to activate all control functions   | N/A   | N/A                                      |
| 6 - 10       | Full Luminaire<br>ReCal -  | Recalibrates all mechanical functions and sensor<br>with in the fixture. Also Used to Wake fixture up<br>from shutdown   | N/A   |  |
| 11 - 15      | Fixture Shutdown   | Shuts down all fixture output and turns off all<br>fans - fixture is activated by power cycle or ReCal<br>command  | If fixture is<br>powered down<br>then up fixture<br>will auto wake<br>and not startup in<br>Shutdown Mode | N/A                                      |
| 16 - 20      | Reserved Values  |  | N/A   | N/A                                      |
| 21 - 25      | Display - Menu ON  | Switches UI display backlight on remotely - Display will Time out from on after 5 mins   | N/A   | N/A                                      |
| 26 - 30      | Display - Menu OFF   |  | N/A   | N/A                                      |
| 31 - 35      | Tungsten Dimming<br>On**   | Remote switches Tungsten Dimming color shift on  | Holds setting on<br>power cycle   | Yes                                      |
| 36 - 40      | Tungsten Dimming<br>Off (Default)**  | Remote switches Tungsten Dimming color shift off   | Holds setting on<br>power cycle   | Yes                                      |
| 41 - 45      | Dimming Curve<br>Linear**  | Selects Linear Dimming Curve, Also Used to Wake fixture up from shutdown   | Holds setting on<br>power cycle   | Yes                                      |
| 46 - 50      | Dimming Curve<br>S-Curve**   | Selects S-Law Dimming Curve  | Holds setting on<br>power cycle   | Yes                                      |
| 51 - 55      | Dimming Curve<br>Square Law<br>(Default)**   | Selects Square -Law Dimming Curve  | Holds setting on power cycle  | Yes                                      |
| 56 - 60      | Reserved Values  |  |   |  |
| 61 - 65      | Dimmer Snap On**   | Allows for fastest output changes between levels but reduces smoothness dimming LED  | Holds setting on<br>power cycle   | Yes                                      |
| 66 - 70      | Dimmer Snap Off<br>(Default)**   | Ensures all fades between output levels remain smooth and flicker free limits fast instant snaps between levels  | Holds setting on<br>power cycle   | Yes                                      |
| 71 - 90      | Reserved Values  |  | N/A   | N/A                                      |
| 91 - 95      | Color Calibration<br>on  | Turns Color calibration on for fixture to fixture<br>color matching on all mixed and preset colors<br>between fixtures limits highest output and max<br>saturation on some colors  | Holds setting on power cycle  | Yes                                      |
| 96 - 100     | Color Calibration<br>off (Default)   | Turns Color calibration off fixtures may not match fixture to fixture limits fast instant snaps between levels   | Holds setting on<br>power cycle   | Yes                                      |
| 101 - 150    | Reserved Values  |  | N/A   | N/A                                      |
| 151 - 155    | Record User Color<br>Preset**  |  |   | N/A                                      |
| 156 - 170    | Reserved   |  | N/A   | N/A                                      |
| 171 - 175    | Reset fixture to default with the exception of the Mx address, fixture mode and Pixel / Zone selection |  | N/A   | Yes - Will reset<br>DMX address,<br>Mode |
| 176 - 255    | Reserved   |  | N/A   | N/A                                      |

## DMX512 CONNECTION

- At last unit, the DMX cable has to be terminated with a terminator. Solder a  $120\Omega 1/4W$  resistor between pin 2(DMX-) and pin 3(DMX+) into a 5-pin XLR-plug and plug it in the DMX-output of the last unit.
- Connect the unit together in a `daisy chain` by XLR plug from the output of the unit to the input of the next unit. The cable cannot branched or split to a `Y` cable. DMX 512 is a very high-speed signal. Inad-equate or damaged cables, soldered joints or corroded connectors can easily distort the signal and shut down the system.
- The DMX output and input connectors are pass-through to maintain the DMX circuit, when one of the units' power is disconnected.
- Each lighting unit needs to have an address set to receive the data sent by the controller. The address number is between 0-511 (usually 0 & 1 are equal to 1).
- The end of the DMX 512 system should be terminated to reduce signal errors.
- 5 pin XLR: Pin 1: GND, Pin 2: Negative signal (-), Pin 3: Positive signal (+), Pin 4/Pin 5: Not used.

# **5** RDM PARAMETER IDs

Remote Device Management (RDM) is a protocol enhancement to USITT DMX512 that allows bi-directional communication between a lighting or system controller and attached RDM compliant devices over a standard DMX line. This protocol will allow configuration, status monitoring, and management of these devices in such a way that does not disturb the normal operation of standard DMX512 devices that do not recognize the RDM protocol.

# APPENDIX A CARE AND MAINTENANCE

#### Following are a few common problems that may occur during operation.

### The unit does not work - light and fan do not turn on

- Check the connection of power and main fuse.
- Measure the mains voltage on the main connector.

#### Not responding to DMX controller

- DMX LED should be on. If not, check DMX connectors, cables to see if link properly.
- If the DMX LED is on and no response to the channel, check the address settings and DMX polarity.
- If you have intermittent DMX signal problems, check the pins on connectors or on PCB of the unit or the previous one.
- Try to use another DMX controller.
- Check if the DMX cables run near or run alongside to high voltage cables that may cause damage or interference to DMX interface circuit.

## CLEANING

The cleaning of internal must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the fixture's optics.

- Clean with soft cloth using normal glass cleaning fluid.
- Always dry the parts carefully.
- Clean the external optics at least every 30 days.
