

# MAVERICK SILENS

2 PROFILE  
User Manual

## **Edition Notes**

The Maverick Silens 2 Profile User Manual includes a description, safety precautions, installation, programming, operation, and maintenance instructions for the Maverick Silens 2 Profile as of the release date of this edition.

## **Trademarks**

CHAUVET, the Chauvet logo, and Maverick Silens 2 Profile are registered trademarks or trademarks of Chauvet & Sons, LLC (d/b/a Chauvet and Chauvet Lighting) in the United States and other countries. Other company and product names and logos referred to herein may be trademarks of their respective companies.

## **Copyright Notice**

The works of authorship contained in this manual, including, but not limited to, all designs, texts, and images are owned by Chauvet.

© **Copyright 2023 Chauvet & Sons, LLC. All rights reserved.**

Electronically published by Chauvet in the United States of America.

## **Manual Use**

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

## **Document Printing**

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

## **Intended Audience**

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

## **Disclaimer**

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident, or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision; however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Download the latest version from [www.chauvetprofessional.com](http://www.chauvetprofessional.com).

## **Document Revision**

This Maverick Silens 2 Profile User Manual is the 11th edition of this document. Go to [www.chauvetprofessional.com](http://www.chauvetprofessional.com) for the latest version.

## Before You Begin

# 1. Before You Begin

## What Is Included

- Maverick Silens 2 Profile
- Seetronic Powerkon IP20 power cable
- Gel frame and gel frame holder
- 2 spare gobo holders
- 2 Omega brackets with mounting hardware
- Quick Reference Guide

## Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

## Text Conventions

Convention	Meaning
<b>1–512</b>	A range of values
<b>50/60</b>	A set of values of which only one can be chosen
<b>Settings</b>	A menu option not to be modified
<b>&lt;ENTER&gt;</b>	A key to be pressed on the product's control panel

## Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

## **FCC Statement of Compliance**

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## **RF Exposure Warning for North America and Australia**

Warning! This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

## Before You Begin

### Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

**This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.**

**All applicable local codes and regulations apply to proper installation of this product.**

### Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

### Mounting and Rigging

- This product is intended for professional use only.
- This product is for indoor use only! To prevent risk of fire or shock, do not expose this product to rain or moisture. (IP20)
- CAUTION: When transferring product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- The product should be positioned so that prolonged staring into it at a distance closer than 11.5 ft (3.5) m is not expected.
- Make sure there are no flammable materials close to this product while it is operating.
- When hanging this product, always secure to a fastening device using a safety cable.
- Never carry the product by the power cord.

### Power and Wiring

- Make sure the power cord is not crimped or damaged.
- Ensure that the product is connected to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- Never connect this product to a dimmer pack or rheostat.
- Make sure to replace the fuse with another of the same type and rating.
- Never disconnect this product by pulling or tugging on the power cable.

### Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- If the external flexible cable or cord of this product is damaged, it shall be replaced with a special cable or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this product shall only be replaced by the manufacturer, its service agent, or a similarly qualified person.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate the product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- In the event of a serious operation problem, stop using this product immediately!

**If your Chauvet product requires service, contact Chauvet Technical Support.**

### Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product and limit the overall intensity.

## 2. Introduction

### Description

The Maverick Silens 2 Profile is a completely silent, fully featured 560 W 95+ CRI LED yoke profile fixture, featuring CMY+CTO color mixing, a four-blade framing shutter system with rotation, a color wheel, animation wheel, a 10:1 zoom, prism, variable frosts, and two gobo wheels—one static and one rotating.

### Features

- 100% convection cooled for zero fan noise along with silent motion and effects
- 16-bit dimming with selectable red shift of master dimmer for smooth control of fades
- Variable CMY+CTO color mixing system to create a wide pallet of colors
- One rotating and one static gobo wheel with unique, theatrical-based designs
- Interchangeable gobos between rotating and static wheels
- Variable frost system
- +60° or -60° rotation framing shutter system to allow for better framing positioning
- Animation wheel for enhanced visual effects
- Iris for total beam control
- RDM control over DMX for fixture reporting
- 5° to 58° zoom range for variable beam sizes
- True-1-compatible power input and throughput
- Battery backup display with auto-rotate depending on fixture orientation

### Product Overview

Product Dimensions

### 3. Setup

#### AC Power

The Maverick Silens 2 Profile has an auto-ranging power supply, and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (e.g., circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

**Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.**

#### AC Plug

The Maverick Silens 2 Profile comes with a power input cord terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with the product has no plug, or if the plug needs to be changed, use the table below to wire the new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

#### Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse, and replace with another fuse of the same type and rating (F 10 A, 250 V).
4. Screw the fuse holder cap back in place and reconnect power.

#### Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The Maverick Silens 2 Profile supports RDM protocol that allows feedback to make changes to menu map options.

#### USB Software Update

The Maverick Silens 2 Profile allows for software update through USB using the built-in USB port. To update the software using USB flash drive, do the following:

1. Power on the fixture and plug the flash drive into the USB port.
2. Once the flash drive has been detected, the message "Upgrade Firmware" will be displayed. Press <ENTER>. If a different message appears on the display, search for the updated software in the **Menu (Updated Firmware)**. A list of the updated software files will be displayed.
3. Select the file that needs to be uploaded. The message "Are you sure?" will be displayed. Press <ENTER>.
4. If the selected file is correct, the upgrade will be completed. Restart the fixture. If the selected file is incorrect, the upgrade will fail, and the display will go back to the main interface. Repeat steps 1–3 using the correct file.

**Place the .chl file in the root directory of the USB drive.**

**The product's USB port supports up to 32GB capacity and only works with FAT32 file format.**

## Setup

### Mounting

Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#). For our CHAUVET Professional line of mounting clamps, go to <http://trusst.com/products/>.

### Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

### Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which you are mounting the product can support the product's weight. See the [Technical Specifications](#) for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

### Procedure

The Maverick Silens 2 Profile comes with a bracket to which you can attach a mounting clamp directly. Mounting clamps are sold separately. Make sure the clamps are capable of supporting the weight of this product. Use at least two mounting points per product. For the CHAUVET Professional line of mounting clamps, go to <http://www.trusst.com/products>.

### Mounting Diagram

## Signal Connections

The Maverick Silens 2 Profile can receive a DMX, Art-Net™, CRMX, or sACN, signal. The Maverick Silens 2 Profile has two Amphenol XLRnet through ports, and 5-pin DMX in and out ports. If using other compatible products with this product, you can control each individually with a single controller.

### Control Personalities

The Maverick Silens 2 Profile uses a 5-pin DMX data connection, CRMX, Art-Net™, or sACN for its two control personalities: **Dmx Mode 32 CH** and **Dmx Mode 41 CH**.

- Refer to the [Operation](#) chapter to learn how to configure the Maverick Silens 2 Profile to work in these personalities.
- The [Control Channel Assignments and Values](#) section provides detailed information regarding the control personalities.

If you are not familiar with or need more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: [www.chauvetprofessional.com](http://www.chauvetprofessional.com).

### DMX Linking

You can link the Maverick Silens 2 Profile to a DMX controller using a 5-pin DMX connection or a CRMX connection. For more information about DMX, read the DMX primer at: [https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX\\_Primer.pdf](https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX_Primer.pdf).

### Art-Net™ Connection

Art-Net™ is an Ethernet protocol that uses TCP/IP that transfers a large amount of DMX512 data using an Amphenol XLRnet RJ45 connection over a large network. An Art-Net™ protocol document is available from [www.chauvetprofessional.com](http://www.chauvetprofessional.com).

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

### sACN Connection

Streaming ACN, also known as ANSI E1.31, is an Ethernet protocol that uses the layering and formatting of Architecture for Control Networks to transport DMX512 data over IP or any other ACN compatible network.

### Connection Diagram

The three LED indicators in between the Ethernet through ports indicate a connection to a network and activity on that network. They do not indicate whether or not the Maverick Silens 2 Profile is receiving a signal from a controller.

## 4. Operation

### Touchscreen Control Panel

The Maverick Silens 2 Profile has a touchscreen display and six control buttons. Navigate the menu structure by pressing the buttons, touching the images of the buttons on the sides of the display, or touching the desired menu option on the display directly. The touchscreen can be locked and calibrated through the Settings options in the menu (see [Touchscreen Calibration](#) and [Touchscreen Lock](#).)

#### Control Panel Description

Button	Function
	Navigates upwards through the menu list or increases the numeric value when in a function
	Exits from the current menu or function
	Navigates downwards through the menu list or decreases the numeric value when in a function
	Navigates leftwards through the menu list
	Enables the currently displayed menu or sets the currently selected value into the selected function
	Navigates rightwards through the menu list

#### Battery-Powered Display

The Maverick Silens 2 Profile has a battery-powered display that enables access to the menu when the product is powered off. Press and hold **<MENU>** until the display activates (approximately 15 seconds).

#### Home Screen

The Maverick Silens 2 Profile has a home screen that shows the current control protocols, personalities, starting addresses, IP addresses, and universes. To see the home screen, press **<MENU>** repeatedly until it shows on the display. From the home screen, touch any of the displayed control settings to immediately jump to that part of the menu, such as the personality, starting address, or universe, or press **<ENTER>** to reach the main menu.

#### Control Panel Lock

The setting locks or unlocks the control panel.

1. Go to the **Settings** main level.
2. Select the **Lock Screen** option.
3. Select **Off** (control panel stays unlocked) or **On** (locks control panel).

**When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode: 0920**

#### Followspot Mode

The followspot mode disables the pan and tilt motors, allowing the output of the product to be aimed by hand. To enable the followspot mode of the Maverick Silens 2 Profile, hold **<UP>** and **<LEFT>** while the product is powering on. When the product is turned off and back on, the pan and tilt will return to normal function.

## Menu Map

Refer to the Maverick Silens 2 Profile product page on [www.chauvetprofessional.com](http://www.chauvetprofessional.com) for the latest menu map.

## Operation

### Configuration (DMX, Art-Net™, sACN)

Use control configurations to operate the product with a DMX, Art-Net™, or sACN controller.

#### Control Mode

The Maverick Silens 2 Profile works with wired DMX, CRMX, Art-Net™, and sACN control signals. To select which protocol to use:

1. Go to the **Settings** main level.
2. Select the **Control Mode** option.
3. Select the desired protocol, from **DMX**, **CRMX**, **ArtNet**, or **sACN**.

- See the [CRMX Reset](#) section for further setup of CRMX.
- See the [Network Setup](#) section for further setup of ethernet protocols (Art-Net™ or sACN).

#### Control Personalities

To set the control personality:

1. Go to the **Personality** main level.
2. Select the desired personality, from **Dmx Mode 32 CH** or **Dmx Mode 41 CH**.

- See the [Starting Address](#) section for the highest starting address you can select for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

#### Starting Address

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address:

1. Go to the **Address** main level.
2. Select the starting address (**001–488**).
  - The highest recommended starting address for **Dmx Mode 32CH** is **481**.
  - The highest recommended starting address for **Dmx Mode 41CH** is **472**.

#### Network Setup

The Network Setup settings control the IP address, subnet mask, and universe of the product.

##### IP Mode

To choose how the IP address is set:

1. Go to the **Network Setup** main level.
2. Select the **IP Mode** option.
3. Select the desired IP mode, from **Manual** (to set a custom IP address), **DHCP** (the IP address is assigned by the connected network), or **Static** (the product uses a default, preset IP address).

##### Universe

To assign an Art-Net™ or sACN universe to the Maverick Silens 2 Profile:

1. Go to the **Network Setup** main level.
2. Select the **Universe** option.
3. Set the universe, from **000–255** (for Art-Net™) or from **001–256** (for sACN).

##### Manual IP Address

To set the IP address when the **IP Mode** is set to **Manual**:

1. Go to the **Network Setup** main level.
2. Select the **Ip** option.
3. Set the value of the IP address.

##### Subnet Mask

To set the subnet mask:

1. Go to the **Network Setup** main level.
2. Select the **SubMask** option.
3. Set the values of the subnet mask from **000–255**.

## Control Channel Assignments and Values

32CH / 41CH

32CH	41CH	Function	Value	Percent/Setting
1	1	<b>Pan</b>	000 ⇔ 255	0–100%

			136 ⇔ 143	Fast dimmer mode
			144 ⇔ 151	Smooth dimmer mode
			152 ⇔ 255	No function

## Configuration (Settings)

### Absolute Silence

Absolute Silence slows the pan/tilt and all the moving components inside the fixture to make the unit as absolutely silent as possible while operating. To enable or disable Absolute Silence mode:

1. Go to the **Settings** main level.
2. Select the **Absolute Silence** option.
3. Select from **No** (disables Absolute Silence mode) or **Yes** (enables Absolute Silence mode).

### Steady

Steady mode controls the output of the fixture to minimize any drop in output for thermal control. The settings for the Steady mode are based on the ambient temperature where the fixture is in. The hotter the ambient temperature, the dimmer the output. To select the correct Steady mode option:

1. Go to the **Settings** main level.
2. Select the **Steady** option.
3. Select from **Off** (disables Steady mode), **Steady Mode 1** (environment temperature 26 °C), or **Steady Mode 2** (environment temperature 35 °C).

### Red Shift

The Red Shift function allows the light in the fixture to mimic halogen lamp dimming. To enable or disable the Red Shift function:

1. Go to the **Settings** main level.
2. Select the **Red Shift** option.
3. Select from **No** (disables Red Shift function) or **Yes** (enables Red Shift function).

### Pan Reverse

To set the orientation of the pan:

1. Go to the **Settings** main level.
2. Select the **Pan Reverse** option.
3. Select from **No** (normal pan motion) or **Yes** (reversed pan motion).

### Tilt Reverse

To set the orientation of the tilt:

1. Go to the **Settings** main level.
2. Select the **Tilt Reverse** option.
3. Select from **No** (normal tilt motion) or **Yes** (reversed tilt motion).

### Screen Reverse

To set the orientation of the display:

1. Go to the **Settings** main level.
2. Select the **Screen Reverse** option.
3. Select from **No** (right-side up), **Yes** (upside-down), or **Auto** (changes depending on the orientation of the product).

### Pan Angle

To set the range of motion the pan is permitted:

1. Go to the **Settings** main level.
2. Select the **Pan Angle** option.
3. Select from **540** (540°), **360** (360°), or **180** (180°).

### Tilt Angle

To set the range of motion the tilt is permitted:

1. Go to the **Settings** main level.
2. Select the **Tilt Angle** option.
3. Select from **270** (270°), **180** (180°), or **90** (90°).

### Blackout on Movement

To set the Maverick Silens 2 Profile to black out on pan or tilt movement, color wheel movement, or gobo wheel movement:

1. Go to the **Settings** main level.
2. Select the **BL. O. P/T Move** (blackout on pan or tilt movement), **BL. O. Color Move** (blackout on color wheel movement), or **BL. O. Gobo Move** (blackout on gobo wheel movement) option.
3. Select from **No** (no blackout on selected movement) or **Yes** (blackout during the selected movement).

## Operation

### Touchscreen Calibration

If the touchscreen is not responding correctly, it may need to be calibrated. To do so:

1. Go to the **Settings** main level.
2. Select the **Touch Calibration** option.
3. Select from **No** (do not calibrate) or **Yes** (calibrate).
4. Follow the instructions on the display.

### Touchscreen Lock

To lock the touchscreen and limit the display to operation by the menu buttons:

1. Go to the **Settings** main level.
2. Select the **Touch Lock** option.
3. Select from **No** (do not lock the touchscreen) or **Yes** (lock the touchscreen).

### Swap Pan and Tilt

To switch the pan and tilt functions so that what normally controls the pan will control the tilt, and what controls the tilt will control the pan, do the following:

1. Go to the **Settings** main level.
2. Select the **Swap XY** option.
3. Select from **No** (do not swap) or **Yes** (swap so pan controls tilt and tilt controls pan).

### CRMX Reset

To reset the CRMX connection and allow the Maverick Silens 2 Profile to connect to a CRMX transmitter:

1. Go to the **Settings** main level.
2. Select the **CRMX Reset** option.
3. Select from **No** (do not reset) or **Yes** (reset the CRMX connection).

**Follow instructions in the manual or guide for the CRMX controller being used to connect it to the receiver in the Maverick Silens 2 Profile.**

### Display Backlight Timer

To set the length of time before an inactive display will turn off:

1. Go to the **Settings** main level.
2. Select the **Display Timeout** option.
3. Select the length of the backlight timer, from **30S** (30 seconds), **1M** (1 minute), **5M** (5 minutes), or **On** (always on).

### Loss of Data

To set how the product reacts to a loss in control signal data:

1. Go to the **Settings** main level.
2. Select the **Loss of Data** option.
3. Select from **Hold** (holds the last values received before signal loss) or **Close** (blacks out the product).

### Dimmer Curve

To set the dimmer curve:

1. Go to the **Settings** main level.
2. Select the **Dimmer Curve** option.
3. Select the dimmer curve, from **Linear**, **Square**, **I Squa**, or **SCurve**.

### LED Frequency

To adjust the LED frequency of the product:

1. Go to the **Settings** main level.
2. Select the **LED Frequency** option.
3. Select from **20000Hz** or **40000Hz**.

### Preset Selection

To select a preset configuration of menu options:

1. Go to the **Settings** main level.
2. Select the **Preset Select** option.
3. Select from **PRESET A** (default), **PRESET B**, or **PRESET C**.

- **Changes to settings automatically save to the currently selected preset option.**
- **If no preset option has been selected, changes to settings save to PRESET A.**
- **After selecting a preset option, the product will restart.**

## Preset Synchronization

To transfer saved preset options from one Maverick Silens 2 Profile to another:

1. Connect the Maverick Silens 2 Profile products to receive the preset options by a DMX daisy chain.
2. Make the Maverick Silens 2 Profile with the preset options to transfer the first in the DMX daisy chain.
3. Power on all of the products.
4. Set all of the products to a [Control Mode](#) other than **CRMX** (i.e., **DMX**, **ArtNet**, or **sACN**).
5. On the Maverick Silens 2 Profile with the preset options, go to the **Settings** main level.
6. Select the **Preset Sync** option.
7. Select **No** (to cancel) or **Yes** (to transfer the preset options to the connected products).

- **All menu configurations are transferred except for the IP address.**
- **ONLY connect Maverick Silens 2 Profile products for this function!**

## Reset Function

To reset specific functions or the entire product:

1. Go to the **Settings** main level.
2. Select the **Reset Function** option.
3. Select the functions to reset, from **Pan/Tilt, Iris/Prism, Color/CMY, Shutters, Gobo/Gobo Rotate, Frost, Animation, Zoom, or Entire Fixture**.
4. Select **No** (to cancel) or **Yes** (to reset the selected functions).

## Factory Reset

To reset the product to factory default settings:

1. Go to the **Settings** main level.
2. Select the **Factory Reset** option.
3. Select **No** (to cancel) or **Yes** (to reset the product configuration to default factory settings).

## Test Mode

### Auto Test

To have the Maverick Silens 2 Profile automatically test all functions one after the other:

1. Go to the **Test** main level.
2. Select the **Auto Test** option.

### Manual Test

To manually test an individual function of the Maverick Silens 2 Profile:

1. Go to the **Test** main level.
2. Select the **Manual Test** option.
3. Select a function to test. (Available functions are: **Pan, Pan Fine, Tilt, Tilt Fine, P/T Speed, Dimmer, Dimmer Fine, Shutter/Strobe, Virtual Strobe, Cyan, Magenta, Yellow, CTO, Color, Hue Adjustment, Red Shift, Rotating Gobo Wheel, Rotating Gobo Wheel Index Fine, Static Gobo Wheel, Animation Wheel, Shutter Rotate, Shutter 1, Shutter 1-1, Shutter 2, Shutter 2-1, Shutter 3, Shutter 3-1, Shutter 4, Shutter 4-1, Focus, Focus Fine, Auto Focus, Zoom, Zoom Fine, Prism, Prism Rotation, Iris, Frost, and Frost Fine**)
4. Increase or decrease the value of the selected function from **000–255** to test it.

### System Information

The information section of the menu displays statistics and the current status of the product's various functions. To view these information sections:

1. Go to the **Information** main level.
2. Select which information to view, from **Fixture Information** (shows the firmware version, DMX address, temperature, running time, IP address, Subnet Mask, and MAC address), **Error Information** (shows any error the product has), or **DMX Values** (shows the current values of all signal input channels).
3. If necessary, scroll up and down to view all information available in the selected option.

### Offset Mode (Zero Adjust)

The Offset mode provides fine adjustments for the home position of every moving part in the optical path and pan and tilt movements. To adjust these options and prevent borders from showing or reduction of the light output:

1. From the main level screen, press and hold **<MENU>** until the passcode screen appears.
2. Enter the passcode: **0920** and press **<ENTER>**.
3. Select the "zero" position to adjust, from **PAN, TILT, COLOR, GOBO, GOBO ROTATE, GOBO2, ANIMATION, FOCUS-GOBO, FOCUS-GOBO2, ZOOM, PRISM, PRISM2, PRISM ROT, IRIS, FROST, FROST2, CRI FILTER, CYAN, MAGENTA, YELLOW, CTO, MAC4, MAC5, or MAC6**.
4. Adjust the "zero" position for the selected function from **000–255**.

### Web Server

The Maverick Silens 2 Profile Web Server can be accessed by any computer on the same network as the product. It allows network access to system information and settings, such as control setup, manual testing of all functions, firmware updates, and the ability to change the Web Server password.

1. Connect the product to power.
2. Set the **Control Mode** to **ArtNet** and the **IP Mode** to **Static**.
3. Connect the product to a Windows computer with a network cable.
4. On the computer, set the first value of the IP address of the new network to match the first value of the IP address of the product. The IP address of the product is displayed on the **Home Screen**.
5. Enter the IP address of the product into the URL bar of a web browser on the computer.
6. Enter both the user name and password as **admin** to log in.

#### Information

The Information page on the Web Server displays the current settings and the system information of the Maverick Silens 2 Profile.

#### Setup

The Setup page on the Web Server provides options for control, similar to the **Setup** menu on the product. Click **Save Settings** to send the new configuration to the product.

#### Manual Test

The Manual Test page on the Web Server allows all output functions of the product to be controlled through the browser. To set all functions back to default, click **Reset**.

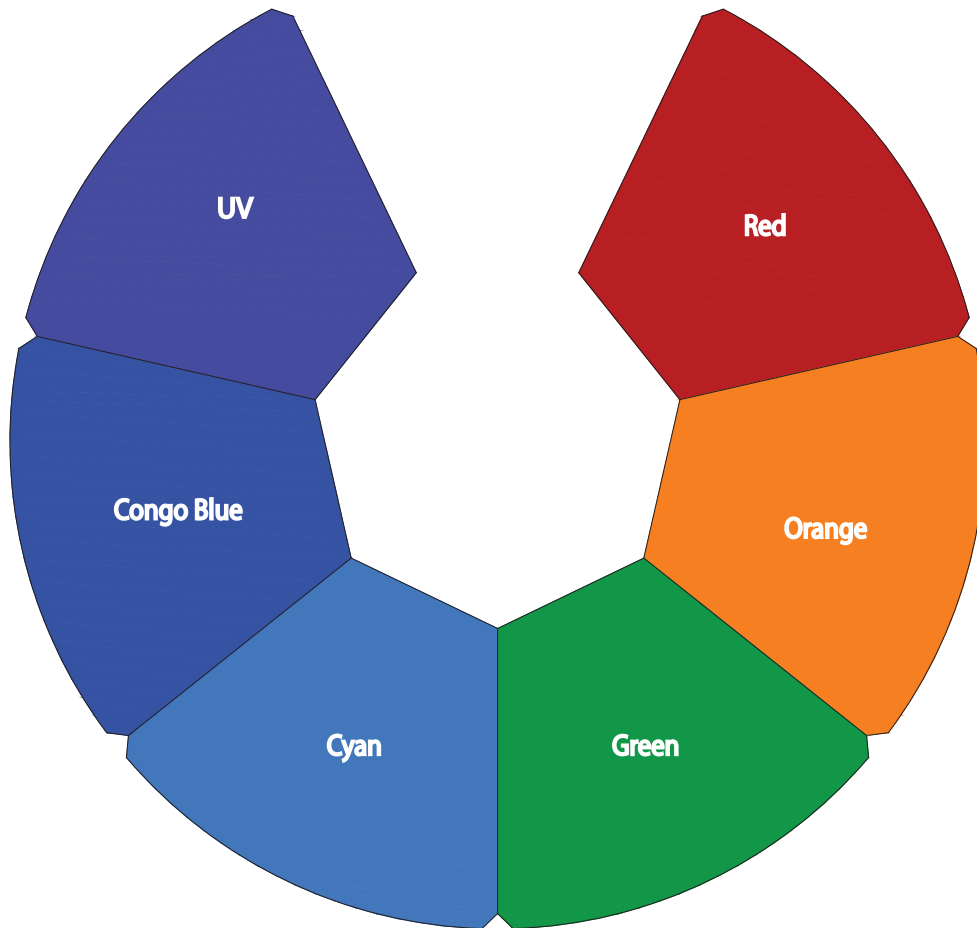

#### Firmware Update

The Upgrade page on the Web Server allows the product to be updated with the latest firmware. Go to <https://www.chauvetprofessional.com> to download firmware updates.

#### Security

The Security page on the Web Server gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

## Gobo Replacement

The gobos in gobo wheel 1 are removable from their gobo holders. This operation is quite simple, although it requires the technician to carefully follow the recommended procedure.

- **Make sure to disconnect the product's power cord before replacing a gobo.**
- **Always replace a gobo with a gobo of the same dimensions.**
- **When inserting a glass gobo, always make sure that the shiny side of the gobo (glass base) faces the lamp. This provides a layer of protection against the high temperature from the lamp.**

### Procedure

1. Turn the product off and disconnect it from the power outlet.
2. Open the head cover by loosening the screws on the top cover.
3. Separate the gobo holder away from the gobo wheel by pushing it toward the front of the moving head (direction 1 in the diagram). Be careful not to push the gobo out of the gobo holder.
4. Extract the gobo holder by pulling it outward (direction 2 in the diagram).
5. On a flat surface, remove the expansion ring that holds the gobo in place and remove the gobo from the gobo holder.
6. Insert a new gobo and hold it in place with the expansion ring.
7. Slide the tip of the gobo holder under the pressure plate near the center of the gobo wheel.
8. Push the gobo holder inwards. **DO NOT** force the gobo holder into the gobo wheel slot. If correctly installed, the gobo holder should easily slide into the gobo wheel slot.

# 5. Maintenance

## Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean your lighting products at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

**Always dry the transparent surfaces carefully after cleaning them.**

**Do not spin the cooling fans with compressed air. Damage may result.**

## 6. Technical Specifications

### Dimensions and Weight

Length	Width	Height	Weight
17 in (433 mm)	10.8 in (276 mm)	31.1 in (792 mm)	75.5 lb (34.4 kg)

**Note:** Dimensions in inches are rounded.

### Power

Power Supply Type	Range	Voltage Selection
Switching (internal)	100 to 240 VAC, 50/60 Hz	Auto-ranging

Parameter	100 V, 60 Hz	120 V, 60 Hz	208 V, 60 Hz	230 V, 50 Hz	240 V, 50 Hz
Consumption	650 W	640 W	639 W	648 W	654 W
Operating current	6.53 A	5.45 A	3.10 A	2.82 A	2.75 A
Power linking	13.6 A (2 products)	13.6 A (2 products)	13.6 A (4 products)	13.6 A (4 products)	13.6 A (4 products)

Power I/O	U.S./Worldwide	UK/Europe
Power input connector	Seetronic Powerkon A	Seetronic Powerkon A
Power cord plug	Edison (U.S.)	Local plug

### Light Source

Type	Color	Quantity	Power	Current	Lifespan
LED	Cool white	1	500 W	15.5 A	30,000 hours
	RGB	1	60 W	3.2 A	50,000 hours

### Photometrics

Beam Angle	Field Angle	Zoom Range	Illuminance @ 5 m (6.4°)	Illuminance @ 5 m (53.7°)
5° to 50°	6° to 54°	5° to 58°	29,598 lux	640 lux

Cutoff Angle
7° to 58°

### Thermal

Maximum External Temperature	Cooling System
113 °F (45 °C)	Convection

### DMX

I/O Connector	Channel Range
3 and 5-pin XLR	32 or 41 channels

### Art-Net™/sACN

I/O Connector	Channel Range
Amphenol XLR Net RJ45 in/out	32 or 41 channels

### Ordering
